## STRONG ARGUMENTS

- Hydraulic driven
- Detachable rake arms
- Good ground following capability
- Wheels with height adjustment
- Easy mounting

The Rotary Rake KR 250 is the ideal tool to remove cut-off grass from ditches.

The rake is hydraulic driven and can be mounted on tractors with boom arms. Two heavy duty castors control the raking height. The rake teeth are made of heavy-duty springs, which differ when hitting obstacles.

ROTARY RAKE KR	250
Working width (m)	2.5
Weight (kg)	120
Heavy-duty springs	9
Oil flow (l/min.)	50
